The original comment period was to have closed December 26, 2000 on the proposal published in the October 27 Federal Register. The notice of extension was published in the Tuesday, December 12, 2000, edition of the Federal Register, Vol. 65, No. 239, p. 77528. The new comment period closed February 9.

The proposed rule would require certain savings and loan holding companies to notify OTS before engaging in, or committing to engage in, a limited set of debt transactions, transactions that reduce capital, some asset acquisitions, and other transactions. The proposal also sought comment on a proposal to codify OTS's current practices for reviewing the capital adequacy of savings and loan holding companies and, when necessary, requiring additional capital on a case-by-case basis.

SUPPLEMENTARY INFORMATION: The proposed rule, published in the **Federal Register** on October 27, 2000 (65 FR 64392), indicated that public comments were to be submitted to the OTS no later than December 26, 2000.

OTS received two requests for an extension of the comment period. One request states that the rule proposes a significant change to OTS policy and that compliance with the current comment deadline would require a significant dedication of resources in the midst of year-end activities. The second request indicates an extension is warranted because the issues addressed in the proposal are of sufficient importance and complexity.

To afford the public adequate time to comment, OTS has determined to extend the comment period for 45 days to accommodate these requests. Therefore, the comment period is hereby extended until February 9, 2001.

Dated: December 6, 2000.
By the Office of Thrift Supervision.

Ellen Seidman,

Director.

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce Corporation (Formerly Allison Engine Company) AE 2100 and AE 3007 Series Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD), applicable to Rolls-Royce Corporation, (formerly Allison Engine Company), AE 2100 and AE 3007 series engines. This proposed AD would require a one-time acid etch inspection of the 2nd stage high pressure turbine (HPT) wheel for cracks. If the wheel is cracked, this proposed AD would require replacement of the turbine wheel with a serviceable part. This proposed AD is prompted by a report of a 2nd stage turbine wheel that was returned from the field with cracks in the aft bore face. The actions specified by this proposed AD are intended to detect and prevent early development of cracks due to low cycle fatigue of the HPT 2nd stage wheel in the aft bore face that can lead to wheel failure, power loss, and possible damage to the airplane.
