**MEMORANDUM FOR:** Chief Executive Officers

**FROM:** Scott M. Albinson 

**SUBJECT:** Preliminary Examination Response Kit -  
Interagency Loan Data Request

The Office of Thrift Supervision (OTS) recently adopted an Interagency Loan Data Request form for the purpose of electronically collecting, reviewing and analyzing a thrift's loan portfolio data. The document conforms the loan data requested to the standard data sets used by the Federal Deposit Insurance Corporation, the Federal Reserve Board, the Office of the Comptroller of the Currency, and the Conference of State Bank Supervisors.

Since many service bureaus already use the Interagency Loan Data Request format for their clients that are banks, we hope this will make the examination process quicker and less burdensome for you. The loan data request format does not require you to provide any information, however, that you do not already have available electronically.

As we have in the past, we will contact you prior to an examination to discuss the data that you have and the form in which you can provide it. We will also supply the name and telephone number of someone in the local OTS regional office you may contact with questions.

---

OTS scheduled your institution for an examination that will begin on \_\_\_\_\_. During this examination we plan to use the Interagency Loan Data Request for reviewing and analyzing loan portfolios. We request that you provide the information on high-density, 3-1/2" diskettes or compact disks (CDs) in a pre-defined, fixed-width format (see the attached instructions).

Your participation is voluntary. We will contact you before the examination to discuss the data that you have and the form in which you can provide it. If you have any questions before this initial contact, you may call \_\_\_\_\_ at \_\_\_\_\_.

Do not create or capture any information that is not already available electronically. We ask that you provide only data already available in electronic form. If a data field is not available, then enter spaces. Do not insert a null character or skip the data field. If possible, please provide a reconciliation report of the electronic data to the TFR line numbers. Provide the name and telephone number of a person whom we may contact with questions.

---

**INTERAGENCY LOAN DATA REQUEST**

Please provide separate diskettes or separate CDs for the following pools of loans using a PC-readable format:

Homogeneous Loans and Leases:<sup>1</sup>

1. Owned one- to four-family loans.
2. All consumer loans. If necessary, consumer loans may be segregated into multiple homogeneous pools (which were similarly underwritten), and each pool should be on a separate diskette or CD.

Nonhomogeneous Loans and Leases:<sup>2</sup>

1. All other loans not identified above.

If all the loans from any homogeneous pool or the nonhomogeneous pool will not fit on one diskette or CD, it is acceptable to provide that pool on multiple diskettes or CDs. Do not include duplicate records. Report each loan only once per file.

You may not be able to supply data for every field requested on this form. However, the more data you can supply, the smoother the exam process will work. All fields are required. If a data field is not available, then enter the appropriate number of spaces. Do not insert a null character or skip the data field.

If you need assistance, please contact \_\_\_\_\_ at \_\_\_\_\_. We also welcome your comments and suggestions for improving this process.

---

<sup>1</sup> Homogeneous assets amortize monthly and are typically underwritten based on common, uniform standards. Classification decisions are generally based on delinquency status.

<sup>2</sup> Nonhomogeneous assets are less likely to be uniform and classification decisions are based on broader considerations than just delinquency status. Examples include commercial real estate and commercial or construction loans.

**Technical Instructions**

**Data Date**

Please provide the loan information as of \_\_\_\_\_ (quarter-end date).

**FDIC/FRB/OCC Data Fields**

The data requested in the Interagency Loan Data Request is the standard data sets used by the Federal Deposit Insurance Corporation, Federal Reserve Board, the Office of the Comptroller of the Currency, and the Conference of State Bank Supervisors. If your service bureau also services commercial banks, you may save time responding to this request by starting with the FDIC/FRB/OCC data.

**Field Order**

The data fields must appear in the exact order listed in the Data Field Definition Form. Please provide a file description, printed or electronic version, identifying each data field in the order found in the record.

**File Format**

Each single distinct horizontal row should contain all the data for each loan. Do not wrap data for a single loan into two or more rows or combine data from more than one loan into a single row.

**Media**

Please download loan information to a 3-1/2" high-density diskette(s) or CD(s) in an IBM compatible, PC-readable format.

**File Size Limitation**

If all the loans will not fit on one diskette or CD, it is acceptable to provide them on multiple diskettes or CDs. Due to the size limitations of our Microsoft Excel application, if any file contains more than 65,450 loans, please contact \_\_\_\_\_ at \_\_\_\_\_.

**File Compression**

Please let us know if you compressed the files and, if so, how to decompress them.

## **File Type**

Please provide the data in an ASCII text, fixed width, ANSI standard format following the file description provided. The following rules apply when using ASCII text, fixed width, ANSI standard:

— A/N Alphanumeric:

- Only ASCII character codes 32 through 126.
- Alphanumeric fields should be left justified and padded (to the right) as necessary with spaces (ASCII character code 32). Do not use text delimiters. For example:  

This → John Doe      Not This → “John Doe”
- Certain alphanumeric fields may be restricted to a specific set of values (as indicated for given fields).
- Alphanumeric fields that are not applicable, are unavailable, or that are null fields in your system should be provided as all spaces.

— N Numeric:

- Only ASCII character codes 48 through 57 (i.e., the numerals 0 through 9), ASCII character code 46 (a period or decimal point), ASCII character code 32 (space), or in rare instances (please see note below) ASCII character code 45 (minus sign).
- Numeric fields should be right justified and padded (to the left) as necessary with leading spaces. Use no formatting (commas, etc.).
- ***Except in fields 35, 36, 48, and 80***, numeric fields should always be positive values. Minus signs are an option in these four fields because the data they contain could routinely be positive *or* negative, making use of an absolute value problematic. We will also allow minus signs in field 22 since in some systems overpayments by borrowers on the final payment could push the note into a credit balance.
- Numeric fields may contain a decimal point; the Format field in the file description for each column will indicate the only format acceptable. If a column contains a decimal point, it will have a fixed number of decimal places (as indicated for given fields). If your system maintains decimal (floating-point) numbers to a greater number of decimal places than we request, your values should be rounded (NOT truncated) to the number of decimal places we have requested.
- Numeric fields that are not applicable, are unavailable, or that are null fields in your system should be provided as all spaces.

— D Date:

- Only ASCII character codes 48 through 57 (i.e., the numerals 0 through 9) and ASCII code 32 (space).
- Date fields should always contain 8 characters and be in year month day form (i.e., YYYYMMDD) with no additional formatting (i.e., no slashes or hyphens). Julian dates must be converted. For example, the date July 1, 2001 should appear like: 20010701.
- Dates that are not applicable, are unavailable, or that are null fields in your system should be provided as all spaces.

— Logic:

- Each row should contain the specified number of characters and should be terminated with a carriage-return line-feed character sequence (ASCII character codes 10 and 13).
- Only ASCII character code 78 (capital N – indicating NO or FALSE), ASCII character code 89 (capital Y – indicating YES or TRUE), or ASCII character code 32 (space).
- Logic fields that are not applicable, are unavailable, or that are null fields in your system should be provided as a space.
